- Facilitates installation of Category 5e, 6, 6A, 7, and fiber optic.
- Section:  
38.1 mm x 38.1 mm  
(1 ½ x 1 ½ inches).
- Material UL94V-0.

### LP-EC200 Terminal Cap for Raceways with a section of 38.1 mm x 38.1 mm (1 ½ x 1 ½ inches).

The **LP-EC200** is a fitting that works as a terminal cap compatible with raceways of the same section: 38.1 mm x 38.1 mm (1 ½ x 1 ½ inches).

It is a very elegant, functional, and affordable solution to terminate a raceway that derives wiring from a main path in structured cabling protection of commercial, industrial, or residential environments.

It is part of our line of products and fits precisely on the raceways of its size.

Can be painted with a latex-based paint, easy to install and use.

The fitting is manufactured with fire resistant PVC, UL94V-0 compliant. It holds, guides, and protects wires carrying up to 600 Volt.

It is possible to supply them in custom colors by special order.
