LP-R707COMBLK01
Three (3) Digit Combination Lock Model 01, front and back door installable for Series 7000 Cabinets

The robust Model 01 Combination Lock for Series 7000 Cabinets are installable on their front and back doors and has a matching color black powder electrostatic paint finish for a better looks. It has three (3) digits.

Manufactured with a solid Zinc alloy and with chemical surface treatments for longer finish durability, it has a chromed steel lock mechanism.

The combination lock has three wheels that can be set to a combination of up to 999 different numbers as a password and the key lets you open or close the lock. The lock comes with a preset combination password of "000".

For modifying the password it must be done with the lock in the open condition, only in that way is when you can make changes, once the new password is set you must turn 90º counterclockwise the lock so as to memorize it. Once locked, you set the digit wheel to the correct new password and turn the key 90º clockwise to open it.

The LP-R707COMBLK01 combination Lock is an ROHS product.
