LP-RU07110DSPDU

19-inch Rack-Mountable Power Distribution Unit (PDU) with ten (10) NEMA 5-15R Outlets (2 front, 8 rear) and aluminum body.

The **LP-RU07110DSPDU** Single-Phase 8+2 110V-120V Basic Power Distribution Unit PDU is the perfect low cost and double side (front and rear) highly versatile unit for CCTV, networking, telecommunication, audio/video and sound systems applications.

It is 19" rack mounted and suited for dense environments. LanPro **LP-RU07110DSPDU** features front and rear load bank with 5-15R outlets 8 in the rear and 2 in front. The NEMA 5-15P input plug with long sturdy rubber 10-foot (3 m) cord connects to your power outlet or even better to the facility's UPS to distribute power to connected equipment.

The illuminated main switch allow to turn on/off the load and also allows the user to know if the is power available on the power strip. A 15A circuit breaker protects connected equipment from dangerous overloads. This is an all-metal housing and mounts in 1U EIA standard space. Also could be perfectly installed on shelves if necessary.

This PDU can be installed at the front or rear of a 4 post open rack or cabinet without problem. This front/rear configuration is more useful than the traditional front-only counterparts.
