

## LPT-314BK Punch Down Tool for Terminating Structured Data and Telephone Cables in Kröne or 110/88 type Terminal Blocks.

LPT314BK\_SS\_ENB01W

### Features:

- Inserts and cuts terminations in one single operation.
- Adjustable high pressure of impact.
- Extremely rugged and reliable.
- Precision blades are interchangeable and reversible between 110/88 and German Kröne standards.
- Easy to handle, comfortable grip.
- Colored for easy location on the working place.
- Finishing:  
Black oxide coating.
- Allows you to terminate a data cable or telephone cable.
- Necessary for structured cabling termination in all the categories, including telephony.

### LPT-314BK Punch Down Tool for Terminating Structured Data and Telephone Cables in Kröne or 110/88 type Terminal Blocks.

The LanPro **LPT-314BK**, very durable and reliable tool, also named 110 or Kröne punch down tool, with a traditional design, is a hand-held impact tool that helps the telecommunication technician to terminate structured cabling connectors with insulation displacement like punch down blocks, keystone-compatible jacks, or patch panels with IDCs of the 110 or Kröne standard.

Normally used for terminating Ethernet cable with four (4) twisted pairs with solid copper wires or telephone multi-pair cables.

It has an ergonomic and easy to hold handle, an internal adjustable spring loaded impact mechanism. Comes with the blade for better economy (most of the models come without the blade, which must be purchased separately).

Body handle made of resin and fiberglass for outstanding durability. Do not compare to cheaper plastic imitations. It has a high pressure impact capability.

Pressure is adjustable. It also has a convenient storage for additional spare blades.

**A Specifications:**

Operation	Inserts and cuts operation in one operation
Pressure of impact	Adjustable
Type of jacks	Keystone compatible IDCs and 110/88 type of terminal blocks
Wire/Cable type	Solid AWG 20 to AWG 24
Wire cutter	Yes, on one side of blade
Blade type	Can be interchanged/reversed for cutting wire in same operation
Blade material	Drop forged hardened carbon steel
Handle material	Resin and fiberglass
Weight	0.25 Kg
Body material	Carbon steel
Finish	Black oxide
Spare Blades	LPT-14B for 110/88 type of terminal LPT-14BK for Kröne type of terminal
