LPT-Xfast 4-Pair Termination Tool for X-Class Jacks made by LanPro, 123 Manual
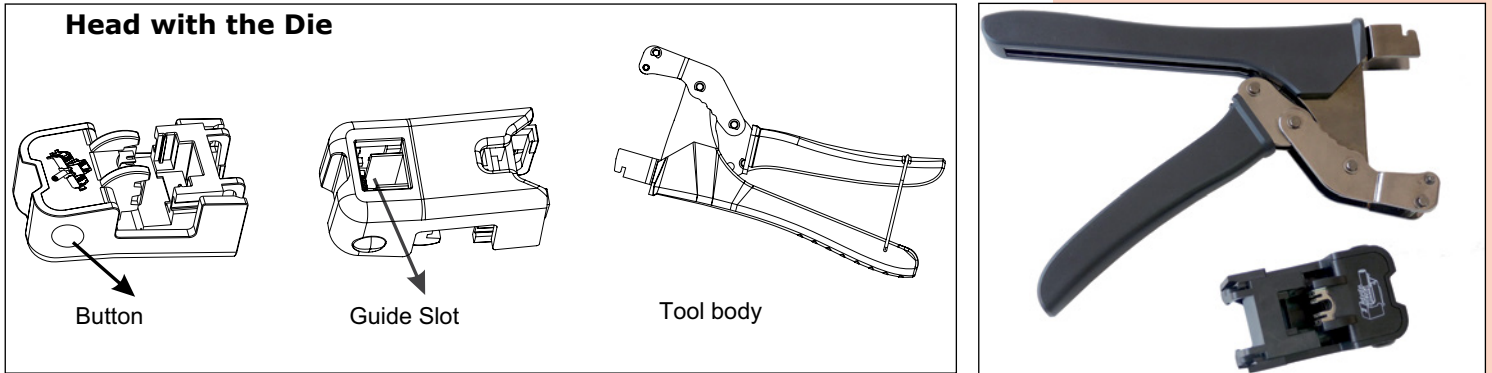

LPT-Xfast 4-Pair Termination Tool for X-Class Jacks made by LanPro, 123 Manual

The **LPT-Xfast** 4-Pair Termination Tool has been designed for the termination of all the LanPro X-Class Series Keystone compatible Jacks.

This M123 document will guide you on its use for the preparation of quality terminations.

A **Components of the LPT-Xfast tool**

It is composed of two parts, the head including the die and the body.

Head with the Die

Button   Guide Slot   Tool body
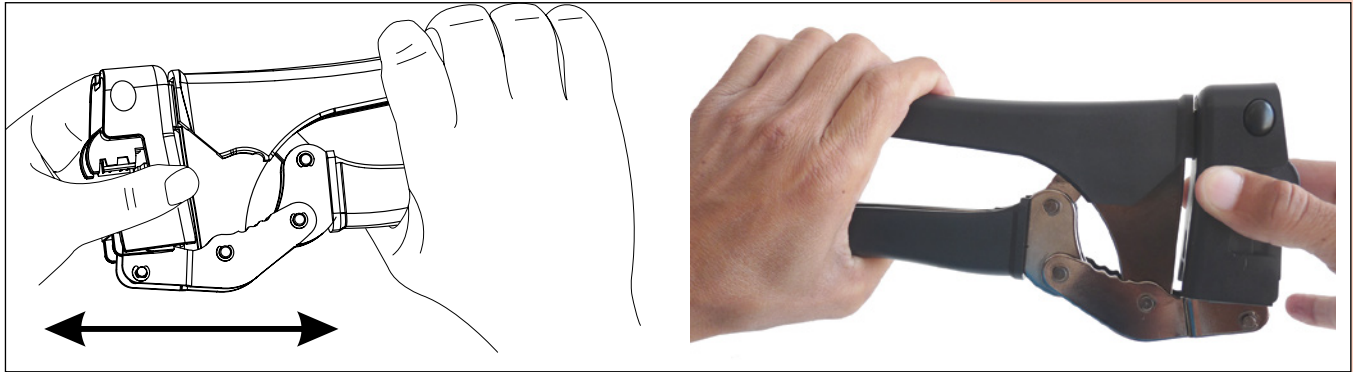

B **How to assemble the LPT-Xfast tool before use**

1.- Insert the guide slot of the head with the Die into the tool body.

2.- Press the button at both sides while pushing the body on to the head with the Die until securely fixed.

Press toward

www.lanpro.com

3.- Move forward the die and make sure it is completely fixed.

C   **Precautions**

✔ Correct

✘ Incorrect

⚠ Please do not press the tool, when A, B sides are touching and there's no keystone ✗-Class Jack inside the die.

D   **Termination**

Install the wires and place them securely into the insulation displacement terminals, following the appropriate color code (T568A or T568B).
