Network Cable, all Weather Outdoor  
CAT 5e type U/UTP, solid, Bimetallic 40% copper,

in 1000 ft wood spool.**

This cable is manufactured with bi-metallic technology, with the purpose of lowering cost without compromising performance and certification for most of the structured cabling applications in the market.

The technology of Bi-metallic cables is based in the high frequency skin effect in which most of the current flows near the surface of the conductor and much less in the core. This is why the core is aluminum and the surface is copper.

Excellent handling characteristics for the installer.

With its AWG 24 wires, it gives excellent characteristics to the user.

A Copper/Aluminum ratio of 40/60, warrants the user excellent characteristics for the price. The resistivity per meter, and other electric characteristics permit true certification as a CAT 5e UTP cable for 100m runs.

An uniform structure along the length of the cable, by means of uniform wire twist machining in the fabrication process, reduces cross talk between pairs to values that ensure certification.

### A Benefits on the use of HDPE jacket on exterior cabling systems:

●	Good priced.
●	Can withstand wide range of temperatures, from freezing to desert hot environment.
●	Ideal for use on beaches, coastal, etc.
●	Made of NON recycled HDPE.
●	UV resistant.
●	Abrasion resistant.
●	Stiff.
●	Resistant to most solvents, fuels, greases, etc.
●	Resistant to corrosion.
●	Ideal for Access Point, Data Radios, trunk between buildings, outdoor cameras, etc.
<b>Note: Take note this cable is intended to be used outdoor, never indoor as is a flammable cable with toxic fumes.</b>
