

## LPT-F30TOOL FIBER CUTTER MANUAL

- **1.** Strip off the buffer with proper length from the 125 um fiber.
- **2.** Squeeze the two ears to open the valve, and carefully place the 125 um fiber onto the cutter, then release the ears to clip the fiber.

- **3.** Press the arm of cutter to cut the fiber, then bend the cable & latch together to break the fiber.
- **4.** Squeeze the two ears to take out the excess fiber

### CAUTION

- Don't use it to cut other cable except the 125 um bare fiber.
- Always wear protective goggles when operating this cutter.
- Keep this cutter away from the children.
