

LP-1522 Access Point/Router with High-Power PoE Technology (800mW) with the standard 802.11 b/g and external antenna

LP1522_SS_ENB01W

Characteristics

- Access Point/Router.
- It supports Gateway Modes.
- High-power design for a wide operating range.
- It complies with standard: 802.11b/g.
- WEP, WAP-64/128bit (WEP), WPA TKIP Encryption.
- Access Control to wireless users.
- Wireless site survey.
- TCP/UDP/ICMP/ARP protocol stack.
- Dynamic DNS.
- WDS.
- VPN pass-through with multiple sections.
- Firewall, DoS, IP/Port/MAC filters.
- Virtual DMZ.
- DHCP Client Server.
- WAN access mode.
- PPPoE PPTP.
- Client DHCP.
- Fixed IP address.
- UPnP.

LP-1522AW

LP-1522, Access Point/Router with High-Power PoE Technology (800mW) with the standard 802.11 b/g and external antenna

The LP-1522 by Lanpro is a high-power Access Point/Router with advanced security, design specifically for HotSpot and Business markets.

The LP-1522 wireless Access Point (AP)/Router allows any 802.11b or 802.11g client to access to resources of the Ethernet network. A comprehensive set of features that allow easy access to the office network while a high security level is maintained.

It has a Ethernet data port with the standard Power over Ethernet (PoE) and it comes in small size, this is why this LP-1522 is ideal for being installed in the ceiling or where space is limited.

It gives 800 mW of power in antenna, going beyond our competitors. The LP-1522 is the most cost-effective solution to provide 54Mbps in a wireless network.

A robust metallic box makes the LP-1522 less susceptible to vandalism, and also improves heat dissipation. This unit can be easily attached to walls, cabinets and ceiling. It is for indoor usage.

In its LP-1522AW version, the LP-1522 is supplied in an IP-67 outdoor box that includes a LP-SW501 Switch that leave 4 Ethernet 10/100 Mbps ports free, and which includes outlets for power sources and any other accessory that you want to include.

This configuration facilitates the integrator to use this radio in outdoor environment to very competitive prices.

How to Order

**LP-1522 Access Point/Router with High-Power PoE Technology (800mW)
with the standard 802.11 b/g and external antenna**

**LP-1522AW Access Point/Router with High-Power PoE Technology (800mW)
with the standard 802.11 b/g and external antenna inside a IP-67 Enclosure**
