

LP-RAD900 0.9 m Diameter Radome for Parabolic Antennas

LPRAD900_SS_ENB01W

Characteristics

- Installs easily directly on the parabolic dish antenna.
- Includes stainless installation screws.
- Made with Ultra-Lightweight Fiberglass.
- Anti-UV finish treatment.
- Drain Holes.
- Used in 0.9 m diameter Parabolic dish type antennas.
- All weather usage.
- Long life.
- For use on the LP-PAR5832 Parabolic Dish Type Antenna.

LP-RAD900 0.9 m Diameter Radome for Parabolic Dish Type Antennas.

The fiberglass Radomes are robust, high quality and easy to install on Parabolic Dish Type antenna Systems made by Lanpro. They protect them from harsh environment phenomena like Snow, Rain, Wind, Sand Storms, blizzards, corrosion, birds, etc.

A Technical Specifications

Diameter	0.9 m
Height	0,292 m
Color	Gray
Weight	4.5 Kg
Material	High resistance and Light weight Fiberglass
Mounting	Stainless Steel Screws
Drain holes	Located in the lower part

B How to Order

LP-RAD900 0.9m Diameter Radome for Parabolic Dish Type Antennas.
