LP-F51B07530M
LanPro's Stainless Steel Band 3/4",
30m per spool

LanPro's banding or strapping products and accessories are developed to bundle items together, to attach industrial fittings to the poles.

Banding system is a set of fastening materials and special fixing devices made of stainless steel or steel, covered with special materials, gas, oil and mining industries, fixing signs to the power line.

Due to advantages as extended service life; extremely easy and convenient in use, securely and tightly attaching, strapping accessories can be applied very widely: in electrical fastening solutions, in construction of electrical distribution lines: low voltage and high voltage ABC lines, overhead transmission lines, telecommunication lines, construction of outdoor passive optic networks, street or traffic signs and video cameras, tubes and other pole hardware, marine and railway transportation.

Steel clamps for the steel band. 2 per strap is recommended.
