**LP-F51CBTP01**  
**LanPro's Cable Bracket TP type model 01**

The suspension and tension brackets are designed to anchor or suspense the ADSS, OFNR, figure-8, FTTX, cable dead-end tension or suspension clamps. In addition, used for Fiber optical closures (FOSC) as storage for cable slacks, which appear during the construction of telecommunication network in overhead lines with ADSS, FTTH, drop wire cables.

LanPro provide our customers by anchor and suspension assemblies, which have been tested with dead-ending of flat and round cables applied on the dead-end, double dead-ending routes, and different angles.

LanPro's brackets and hooks are made of steel materials, aluminum, stainless steel materials, what grantee high corrosion resistance and a long period of usage. Operation experience with temperatures ranging from -60°C up to +60°C.

**A Packing**

300 per box, 30kg, 0.035CBM.
